

Statement of Work

ARBuilder + Ethereum AI Code Reviewer

Parties

Client: Quantum3Labs (Q3Labs)

Contractor: Wei Meng + Maco (Xianqi Loye)

Technical Reference

Document	Link
ARBuilder Technical Brief	https://docs.google.com/document/d/1hundGX8gaxDm-Tb8-BCPrq1xeyouvNHmhJdlnUAn3gl/edit?usp=sharing
Ethereum AI Code Reviewer Technical Brief	https://docs.google.com/document/d/1FLt88IHhDA5xmjl8TwHg0BHP-3h_hDfyQSlnYUXuTrY/edit?usp=sharing

Roles & Responsibilities

Person	Role
Wei Meng + Maco	Lead delivery completion, present to Arbitrum reviewer
Diego Flores	PR reviews (QA), AI expert
Gian Marco Alarcon	blockchain support

Ng Ju Peng

PR reviews / approvals, support when needed

Deliverables & Payment Schedule

#	Deliverable	Project	Amount (MYR)	Deadline
1	Proposal + PoC Improvement	ARB	8,000	01/09/2026
2	Stylus + SDK RAG	ETH	15,000	01/16/2026
3	Full dApp Builder	ARB	40,000	01/23/2026
4	Orbit Integration	ARB	32,000	02/06/2026
5	Final Report + Metrics	ARB	5,000	02/12/2026
Total			100,000	

Deliverable Details

1. Proposal + PoC Improvement (8,000 MYR)

Deadline: 01/09/2026

Deliverables:

- Updated proposal aligned with EF requirements
- Improved PoC
- Documentation

Acceptance: Q3Labs approval

2. Stylus + SDK RAG (15,000 MYR)

Deadline: 01/16/2026

Deliverables:

- ARBuilder v0.1 with Stylus code generation
- ARBuilder v0.2 with Arbitrum SDK integration
- MCP integration (Cursor/VS Code)
- Tutorial video (installation, configuration, usage)
- README + user guide
- Open-source release (MIT license)

Acceptance: Arbitrum reviewer approval

3. Full dApp Builder (40,000 MYR)

Deadline: 01/23/2026

Deliverables:

- ARBuilder v0.3 with full dApp scaffolding
- Hybrid RAG implementation (BM25 + vector)
- Generates:
 - Smart contracts (Stylus)
 - Backend (NestJS/Express)
 - Indexer (subgraphs)
 - Oracle integration (Chainlink)
 - Frontend (Next.js/React)
 - Wallet integration (wagmi, viem, RainbowKit)
 - UI styling (DaisyUI)

Acceptance: Arbitrum reviewer approval

4. Orbit Integration (32,000 MYR)

Deadline: 02/06/2026

Deliverables:

- ARBuilder v0.4 with Orbit support
- Orbit chain deployment assistance:
 - Chain configuration
 - Validator setup
 - Custom gas tokens
 - Fee parameters
 - Migration guidance
- Orbit SDK code generation

Acceptance: Arbitrum reviewer approval

5. Final Report + Metrics (5,000 MYR)

might consider starting earlier this one

Deadline: 02/12/2026

Deliverables:

- ARBuilder v1.0 (unified assistant)
- Final report with benchmarks
- KPIs achieved:
 - ≥10 unique developers
 - ≥100 code generation requests
 - ≥20 GitHub stars
 - ≥5 community contributions
 - ≥3 case studies
 - ≥5 projects deployed to mainnet

Acceptance: Arbitrum reviewer approval

Payment Terms

- Payment per milestone after acceptance
- ARB milestones: Paid after Arbitrum reviewer approves
- ETH milestone: Paid after Q3Labs approves
- Invoice submitted per milestone

Invoice Template: [Link to be provided]

Repository

Code hosted under Q3Labs GitHub organization. Gian provides access.
